*ALWAYS WRITES TESTS FOR HIS CODE*

## Presentation

My name is Andrea, I am born in **1996** and I have successfully developed the good habit of continuous learning, thanks to the book ”*Atomic Habits*”.
I enjoy creating and designing useful things with a simple UI.
I don't like using outdated tools or working in environments where the architecture is not valued (since the paycheck will come later).
Check my personal side project app: **ZYME** available on android and iOS! It's a calories counter, i hope you will like it!

## Skills (In order of proficiency)

I consider myself mainly a frontend developer, but I also have experience as a full-stack. I have already worked with **microservices** and **microfrontends** too! Lately i am playing with **gen AI** (LLMs, RAGs, NLP...)

|  |  |
|---|---|
| **Frontend** | **Angular** (RxJS & Signals lover), **Cypress**, **Jest**, **Flutter** (Bloc and Provider for the DI), **React** (Redux / Jotai / Zustand). |
| **Backend** | **Node.js** (Nest.js, Fastify as main choices), **PostgreSQL** (usually with PrismaORM or DrizzleORM), **LangChain** (novice level). |
| **Infrastructure** | Git (usually with CI and PRs), Docker, RabbitMQ, Kubernetes, Linux, Ansible, Terraform, Firebase / Supabase. |
| **Soft Skills** | Agile method, Ability to provide precise estimates, Teamwork, Adaptability, Empathy, Pair programming. |

## Education

**ITIS (Giacomo Fauser)** — *Novara, Italy*
High school diploma, computer science — *Set. 2010 - Aug. 2015*

**Bicocca** — *Milano, Italy*
Bachelor degree, computer science
- **LEFT STUDIES** at my 3rd year, with 4 exams left. I noticed that I couldn't study and work since I was already studying for work.

## Work Experience (5+ yrs)

**Freelancer** — *Comignago (NO), Italy*
Mobile/Web Developer — *Feb 2022 - NOW*
- Working with **Angular** since 2018.
- Working with **Flutter** since 2020.
- Working with **Node.js** since 2018.

**Ennova research** — *Lomazzo (CO), Italy*
Software Engineer — *May 2021 - Feb 2022*
- We worked in big teams, divided in sub-teams according to the **AGILE** method
- Worked in big projects for clients like FAAC, Leroy Merlin, Eni etc...
- **Technical Skills:** Angular, React, Flutter.

**SOFTECH** — *Gallarate (VA), Italy*
Junior developer — *Sep 2018 - Feb 2020*
- SOFTECH offers systems, software and complete services in the field of monitoring and supervision of human interactions with the environment
- Developing external commissions as a full-stack novice.
- Making implementation choices and constantly looking for news/technologies that could benefit the company
- Developing frontend of one of my company's biggest projects (airport industry)
- **Technical Skills:** Angular, Node.js, Leaflet and GIS Databases.

## Secondary interests

I love to study **nutrition** and **working out**! Proud owner of a **pet hedgehog** named Kenny. 🦔

## Languages

| | |
|---|---|
| **English** | Good reader, troubles forming complex sentences during a heavily technical conversation, but I make myself understood. |
| **Italiano** | Native proficiency. |

Thankfully, with generative AI, Google Meet now offers real-time translations, and the trend is clearly moving in that direction!
